

AP Biology Lab Report 12

Brandon Downs

Evander Hock

December 12, 2022

1 Purpose

The purpose of this lab was to explore how different lengths of DNA travel different distances using *Gel Electrophoresis*.

2 Analysis

After analyzing the DNA fragments, the most likely perpetrator is *suspect #7*. We figured this out after analyzing the results from the Gel Electrophoresis run and comparing the crime scene sample DNA to the DNA sample from suspect 7. They are not only the closest, but they are nearly identical.

3 Conclusion

Our results can be seen in...
